

**A. Molina & C.** has been a specialised and leading enterprise in the sector of feather and fibre fillings since 1890. Nowadays, Molina is on the market with feather, in the first place, but also innovative fibers, totally eco-compatible, and processes that grant antibacterial protection. The Research & Design department of A. Molina & C. considers every topic about the comfort in filling materials: to the fore feathers and down, but even all the innovative fibres.

Biosoft product line: Both the pillow (padding and covering) and the bag container are realized with **Ingeo™** fiber. Biopillo, is the maximum expression of the search oriented to the adoption of new row materials and won the latest "Interzum Award: Material Innovation and Design" at Interzum 2007 tradeshow.
